

Federal Computer Week

ECS III: A buyer's guide (A-C)

Jan. 27, 2003

As part of our coverage of the Electronic Commodity Store III program, Federal Computer Week has compiled a synopsis of the products and services available from ECS III contractors.

The information is not comprehensive — some contractors sell thousands of products — but the listings show the breadth of offerings available from contractors and highlights products or services of particular interest, giving customers an idea of where to start shopping.

The contact information was downloaded from the ECS III Web site and verified by the companies. The contractors provided product/service categories and highlights, although this information has been edited for clarity and length.

A&T Systems Inc.

Contract no.: 263-03-D-0512
Address: 12200 Tech Road, Suite 100
Silver Spring, MD 20904
